

EnginSoft is a premier consulting firm in the field of Simulation Based Engineering Science (SBES) with a global presence. It was founded in 1984, but its founder and initial employees had been working in SBES since the mid '70s. Throughout its long history it has been at the forefront of technological innovation and remains a catalyst for change in the way SBES and CAE technologies in general are applied to solve even the most complex industrial problems with a high degree of reliability.

Today, EnginSoft is comprised of groups of highly qualified engineers, with expertise in a variety of engineering simulation technologies including FEM Analysis and CFD, working in synergic companies across the globe. We are present in Italy, France, Germany, the UK, Turkey and the U.S.A. and have a close partnership with synergic companies located in Greece, Spain, Israel, Portugal, Brazil, Japan and the U.S.A.

EnginSoft works across a broad range of industries that include the automotive, aerospace, defense, energy, civil engineering, consumer goods and biomechanics industries to help them get the most out of existing engineering simulation technologies.

DATA SHEET

VOLTA

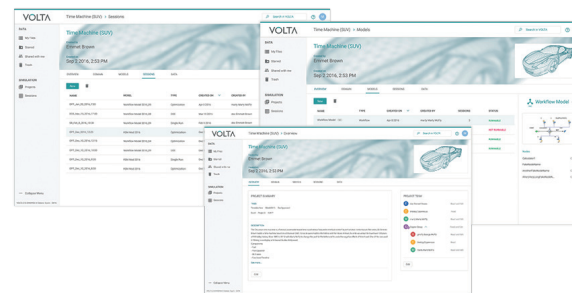

Enabling Innovative
Product Development

Volta is a web-based, collaboration environment that orchestrates simulation data and multidisciplinary business processes, and enables conscious decisionmaking for innovative product development.

Volta helps manage all cross-functional concurrent design steps by integrating multiple modeling formats. Its serviceoriented architecture facilitates the execution, sharing and re-use of the enterprise engineering knowledge.

Volta is a product

Enabling Innovative Product Development

Collaborate on a Global Scale

Coordinate design teams to run optimization and simulation projects across different departments and organizations in a secure environment that facilitates information sharing and visibility.

Capture and Share Knowhow

Achieve better, faster design solutions by aggregating product and process information into a single shared repository that draws on the skills and knowledge of engineer discipline experts.

Gain Access Anytime, Anywhere

Connect to VOLTA from any location, anytime, from computers and mobile devices. Benefit from secure access to processes, data and results.
